

Ada (hache) Cervera

WEB PLATFORM & WORDPRESS SPECIALIST

I like solving problems, whether that's a client's web ecosystem or a bouldering wall.

End-to-end ownership of 15+ live web properties across WordPress, Shopify, Wix and PrestaShop: hosting, DNS, Cloudflare, SSL, backups, migrations, performance audits and multilingual operations (WPML, hreflang). Comfortable troubleshooting layer by layer across DNS, CDN, reverse proxy, application and database, including security headers (CSP, HSTS, X-Frame-Options) and cache strategy. Also hands-on with SEO/GEO/AEO: schema markup and LLM-crawler configuration for AI search visibility. Background in marketing (Jump Yard), moved toward a more technical path since. I work independently, with strong professional proficiency communicating in English, and use AI tools in my daily workflow to move faster: self-hosted homelab (Ubuntu Server, Docker, Tailscale).
